Research Sites

www.quora.com

www.google.com (Suggested Search is located as you start typing your keyword and at the bottom left of Google.)

www.youtube.com (Suggested Search comes up as you type your keyword.)

Screen Capture Software

- 1) www.Screencast-O-Matic.com – This is a free screen capture software with a \$15/annual upgrade (at the time of writing this ebook). The annual upgrade option removes the watermark on the videos. A very low cost in my opinion.

30 Days To A Bigger Email List

- 2) [Jing](#) – This is a free software that also allows you to record videos, and has a low upgrade to make it easier to work with the video files.
- 3) [Camtasia](#) – This is a more expensive web-based software, but honestly worth a serious look if you plan to do lots of videos in the future as it has a simple to use editor that can be used for all kinds of videos not involving your screen captures. I would suggest starting with one of the free or low-cost options to get your feet wet at making videos first.
